## CPE Activity Information

### The Evolving Overdose Crisis: Opportunities for Action

#### Activity Overview

---

This session will delve into the current opioid epidemic landscape, how far we have come, and what is still needed in furtherance of public health protection. Experts will discuss the trends and opportunities that exist regarding prevention and harm reduction, such as the new Centers for Disease Control and Prevention (CDC) prescribing guidelines for chronic pain, which are projected to decrease the number of patients who develop an opioid use disorder (OUD). Attendees will also learn about advances in treatment for those patients who are struggling with OUD, the associated stigma that may prevent them from obtaining the treatment they need, and how pharmacists can provide that treatment.

This home study webinar is a recording of the live activity that was held on May 19, 2022 and was sponsored by Rite Aid Corporation.
