CPE Activity Information

How Boards of Pharmacy Are Addressing White and Brown Bagging

Activity Overview

Payers are increasingly requiring many clinician-administered drugs to be dispensed through specialty pharmacy-based distribution models, commonly known as white bagging and brown bagging. This home study webinar will provide an in-depth discussion of:

1. unique challenges to preserving patient safety and access to care that can arise from payer-driven white bagging and brown bagging;
2. current regulatory aspects of white and brown bagging; and
3. recent board of pharmacy efforts to establish rules around white and brown bagging.

This home study webinar is a recording of the live activity that was held on August 11, 2021.

Learning Objectives

At the conclusion of this webinar, participants will be able to:

1. Define the key terms “white bagging,” “brown bagging,” and “clear bagging” as related to distribution of clinician-administered drugs.
2. Distinguish alternative distribution models from traditional wholesaler-based acquisition models.
3. Provide an overview of notable recent payer policy changes related to white bagging and brown bagging of drugs and industry-wide trends in distribution of clinician-administered drugs.
4. Discuss common compliance concerns and regulatory gray areas that may result from increasing volume and frequency of drugs distributed via white and brown bagging.
5. Review previous actions from select brands of pharmacy to address common compliance concerns and regulatory gray areas around white and brown bagging.
6. Discuss and engage with policymakers to advocate for action to address issues related to payer-mandated white bagging and brown bagging of drugs.
