### Navigating the Regulatory Maze: Telemedicine Compliance and Its Impact on Pharmacies and Public Health

#### Activity Overview

---

During the pandemic, telemedicine became the norm. With the arrival of GLP-1 agonists intended for weight loss, direct-to-consumer telemedicine is becoming increasingly popular. From a compliance perspective, however, not all telemedicine models are created equal.

This presentation will describe common compliance issues involving telemedicine that NABP has encountered through its accreditation programs, examine how these issues impact fulfillment pharmacies, and use prominent case studies to demonstrate the risks associated with non-compliant telemedicine models.

This home study webinar is a recording of the live activity that was held on February 13, 2025.
