

UMPJE™

Sample Question

The following is an example of the type of question that examinees will encounter when taking the UMPJE. This question is presented as an example to familiarize examinees with the format and is not intended to represent content areas on the UMPJE.

Multiple-Choice Question Format

A community pharmacist receives a new prescription for zolpidem tartrate with the number of refills noted as PRN. What is the best course of action for the pharmacist to take?

- A. Fill the prescription for 5 refills with an expiration of 6 months
- B. Refuse to fill the prescription because this medication cannot have PRN refills
- C. Fill the prescription as written after contacting the prescriber

This document is intended as a supplementary aid for preparation to take the MPJE/UMPJE. While every effort has been made to ensure accuracy and relevance, the content is provided "as is" and may be updated, revised, or replaced at any time without prior notice. Use of this document does not guarantee exam performance or outcomes. Sample Questions are provided solely to illustrate exam question format, and question types may be added or removed in future to support changing needs.
